**At Lafayette Cancer Care (LCC), we are continuing our efforts to safeguard the health and safety of our patients and staff as this coronavirus situation continues to evolve. We continue to remain a safe and trusted place for our patients to receive care.**

**Our office is open**, and we will continue to be open unless directed to close (temporarily).

**Until further notice, we are requesting that no visitors enter the clinic, except for one caregiver who assists patients with transportation, translation services, etc. or those vendors delivering essential drugs and supplies.**

All patients, caregivers and vendors entering LCC will be screened. Our clinical staff members are trained to respond swiftly and appropriately to any patient demonstrating symptoms of illness.

Our office is being cleaned and sanitized throughout the day to reduce the risk of infection.

**To provide added convenience, we are piloting the use of telehealth services (telephonic & video consultation) and expect to be able to offer that as an option where possible in the days ahead. Internet access through your phone, tablet or computer would be the only requirement needed by patients.**

We have secured additional supplies such as: masks, gowns, cleaning supplies, etc. Our purchasing team remains in close contact with our suppliers and pharmaceutical distributors and manufacturers. There is no indication that there will be any disruption in drug supplies at this time, and we are watching that closely. The FDA has advised that there is no increased public health risk for American consumers from imported goods.

Please be assured that we have developed and continue to update contingency staffing plans and schedules to ensure we have a ready workforce capable of continuing to deliver high quality care to our patients.

We are continuing to monitor this rapidly changing and unprecedented situation. We will provide further updates as needed. Thank you for entrusting your care to Lafayette Cancer Care.
